Art Unit: 1774

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-47 of copending Application No. 10/351188. Although the conflicting claims are not identical, they are not patentably distinct from each other because mixtures of different antennae are clearly suggested in claims 5 and 17 of SN 10/351,188 (i.e., "the antenna comprises at least one of the compounds..."). Furthermore, the aforementioned application teaches fluoran leuco dyes, phenolic activators, ultraviolet -curable compounds and particulate components.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claims 1, 3-15 and 17-22 are again rejected under 35 U.S.C. 103(a) as being unpatentable over either of the patents to Hayashihara et al. or Satake et al. in view of the patent to Mehta et al. for the reasons of record.

Art Unit: 1774

The fact that the first and second antennae "are independently chosen" does not preclude selection of the same material for both antennae. Recitation of different antennae would overcome this rejection.
